# Public Wireless LAN.

---

The Public Wireless LAN entry page should appear automatically. If this is not the case, please enter **www.pwlan.ch**.

Please check the settings below if no connection can be established. For some devices and operating systems, the SSID **MOBILE** must be selected manually and the connection over a so-called «insecure» network must be authorized.

----------------------	----------------

- **Fast:** High-speed access, up to 5 Mbit/s.
- **Simple:** Direct wireless access to your data.
- **Convenient:** Handy and transparent billing.

### Requirements

- A WLAN-enabled notebook or smartphone.
- A Swisscom NATEL® or private customer DSL subscription, credit card, Value Card or other provider subscription.

### Use with Swisscom NATEL® subscription.

Start the browser to call up the entry page.

Select «NATEL®» and enter the number of your mobile.

You will receive the password by SMS.

Enter the password and start surfing.

### Use with a private customer DSL subscription.

Start the browser to call up the entry page.

Select «Swisscom login».

Log in with user name and password.

## Use with Value Card.

Start the browser to call up the entry page.

Select «Value Card».

Scratch free the password and user ID on your Value Card.

Enter password and user ID.

## Use with credit card.

Start the browser to call up the entry page.

Select «Credit Card» and specify the credit.

Enter your credit card details.

Save access data (user ID and password) and log in.

## Use with your provider's subscription.

Start the browser to call up the entry page.

Select «Customers of other WLAN providers».

Enter your access data in your provider's login window.
